

## Why we focus on *wellness*

At Cobb & Co Veterinary clinic, we believe in a strong, consistent recommendation for **proactive, preventative** care. Being proactive about your best friend's health allows us to **predict problems**, provide **baseline values**, and assess your pets **response to treatments**. Additionally, early detection of disease allows for **better treatment options** for your pet. Small problems are less expensive than big ones (and easier to manage)!

### Wellness for Dogs

Adults 3-6 • Senior 7-10 • Geriatric 11+

- ☑ Annual (or twice-yearly, for senior patients) nose-to-tail physical exams
- ☑ Core vaccinations: rabies, DAPP (distemper/parvo), leptospirosis
- ☑ +/- lifestyle-based vaccinations: bordetella, influenza, Lyme disease
- ☑ Year-round heartworm, flea and tick prevention and disease testing
- ☑ Screening for intestinal parasites (fecal sample)
- ☑ Age-appropriate blood screenings
- ☑ Urinalysis
- ☑ Proactive dental disease intervention
